

Content Creation App

A complete Android content creation toolkit for video downloading, video splitting, face filtering, and user management.

About the App

Content Creation App is an Android application designed for content creators and social media users. The application provides tools for downloading videos, splitting videos into clips, applying face filters, and managing users through an admin panel. It offers a simple and user-friendly interface that helps users perform content-related tasks efficiently from their Android devices.

App Screenshots

Features

- User authentication
- Firebase login system
- Dashboard management
- Video downloading tool

- Video splitting functionality
- Face filter processing
- License activation system
- Admin panel
- User management
- Secure API integration

Technologies Used

- Java
- Android Studio
- XML
